

MicroProfile

MicroProfile In a Nutshell (1 of 2)

- Began as a collection of independent discussions
- Quickly realized there is common ground
- Start small
 - Functional: JAX-RS, CDI, JSON-P
 - Non-functional: Boot in seconds
 - Stop there. Let community help define roadmap

MicroProfile In a Nutshell (2 of 2)

- Iterate across multiple releases
 - Define use cases and leverage design patterns
 - Which 3rd party libraries?
 - Which standards? JSRs? HTTP/2, OAuth?
 - Create new APIs?
- Build consensus on what works
- Standardize - raise the bar for Java-based microservice application portability

Next Steps

- For the **MicroProfile**
 - Define baseline platform in the next month
 - Deliver multiple implementations by September
 - October - Begin planning follow-on release
- For you
 - Go to [MicroProfile.io](https://microprofile.io)
 - Join the discussion group
 - Participate!
